**Subject:** Microsoft Settlement

-

Microsoft is an extremely abusive company. The abuses presented in the antitrust case against Microsoft are only a small selection of the total.

The proposed settlement with Microsoft is government corruption. If it is accepted, those in the DOJ whose names are involved with it will have to live with it for the rest of their lives.

Those wanting dishonesty in government will be your friends. Those wanting dishonesty will avoid you and oppose you.

Regards,

Michael Jennings
